ABOUT ME

I am a driven professional pursuing a BSc in Information Technology, with a background in commerce and experience in data management and online business development. I'm passionate about using technology to solve problems and create value. Always eager to learn and innovate, I aim to contribute effectively and grow within dynamic and forward-thinking environments.

EXPERIENCE

Spectrum Tours & Travels 2023 - 2024

Data entry Operator

I worked as a Data Entry Operator at Spectrum Tours and Travels from 2023 to 2024, where I was responsible for accurately entering and maintaining customer and booking data in the company's system. My role involved ensuring the consistency and integrity of records, assisting in the preparation of reports, and supporting the team in day-to-day administrative tasks. This experience helped me develop strong attention to detail, time management skills, and a clear understanding of data handling in a fast-paced travel industry environment.

Genuine Bags 2024 - 2025

Online Business developer

I worked as an Online Business Developer at Genuine Bags from 2024 to 2025, where I was responsible for managing and expanding the brand's online presence. My role included handling e-commerce platforms, developing digital marketing strategies, and increasing online sales through targeted campaigns. I collaborated with the design and sales teams to align online promotions with brand goals, conducted market research to identify growth opportunities, and built customer engagement through social media and digital channels. This experience enhanced my skills in online business development, digital marketing, and strategic planning.

EDUCATION

2021
A. G. High School
S.S.C.

I completed my 10th grade at A G High School in 2021, where I built a strong academic foundation and developed important skills for my further education.

2023
A. G. High School
H.S.C.

I completed my 12th grade in Commerce from A G High School in 2023, where I gained a solid understanding of business, economics, and accounting principles that have prepared me for higher education and future career opportunities.

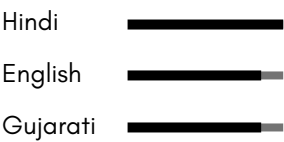

2023 - Current
L. J. University
Bachelor of Science
in Information
Technology.

I am pursuing a BSc in Information Technology at LJ University, where I am gaining knowledge in programming, databases, networking, and software development. The course is helping me build strong technical skills and stay updated with current IT trends.
